Functional modeling — the ICOM model & rules

THE ICOM BOX

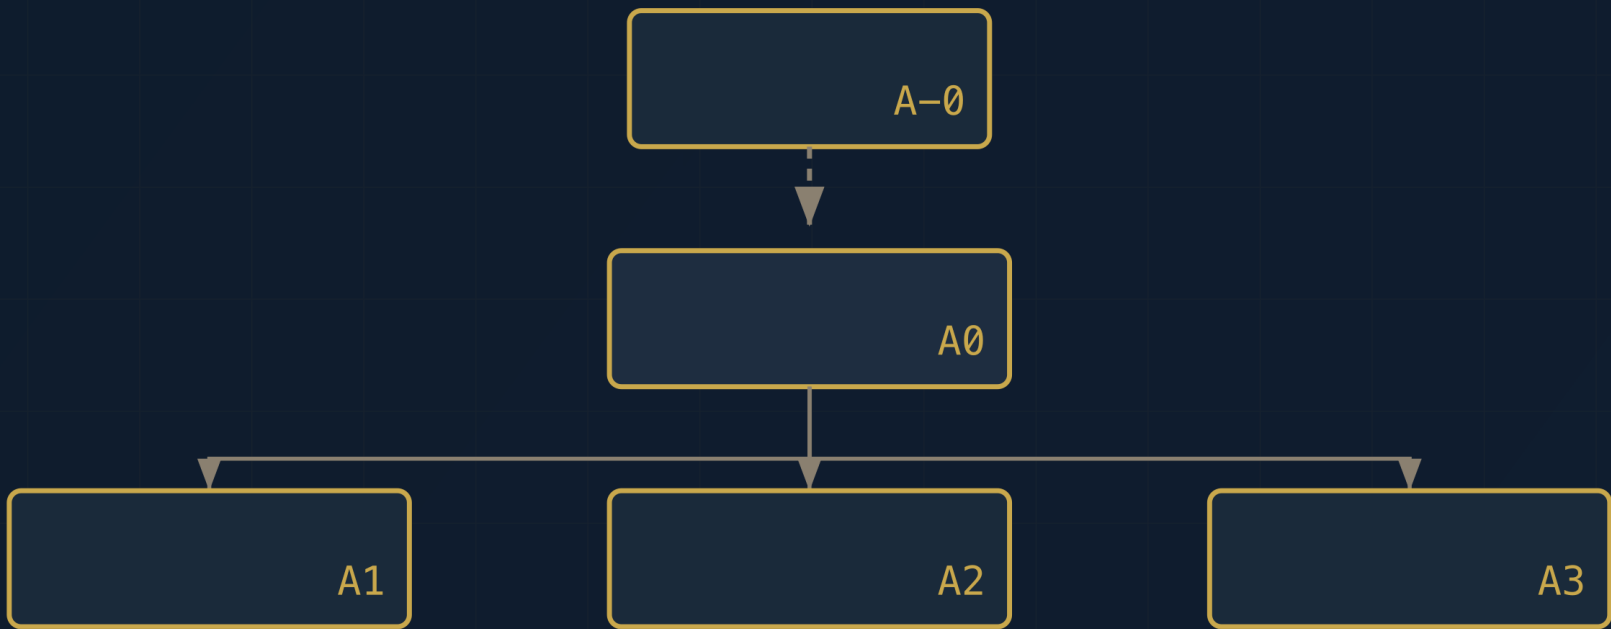

ARROW TYPES

RULES & DECOMPOSITION

- 1 Each box carries a code: A0 context, then A1, A2, A3 as it decomposes.
- 2 A child diagram keeps the ICOM balance of its parent box.
- 3 Decomposition depth is usually 3–5 levels; no order of time is shown.

DECOMPOSITION HIERARCHY

Every box decomposes into a child diagram of 3–6 boxes, one level deeper.
